

# Languages

Language: a set of strings

String: a sequence of symbols  
from some alphabet

Example:

Strings: cat, dog, house

Language: {cat, dog, house}

Alphabet:  $\Sigma = \{a, b, c, \dots, z\}$

Languages are used to describe  
computation problems:

$$PRIMES = \{2, 3, 5, 7, 11, 13, 17, \dots\}$$

$$EVEN = \{0, 2, 4, 6, \dots\}$$

Alphabet:  $\Sigma = \{0, 1, 2, \dots, 9\}$

A string with no letters is denoted:  $\lambda$  or  $\varepsilon$

Observations:  $|\varepsilon| = 0$

$$\varepsilon w = \varepsilon w = w$$

## The usual set operations
